

Rosemount™ 3417

Redundant 4+4 Four-Path Gas Ultrasonic Flow Meter

3417 4+4 Gas Ultrasonic Flow meter

Redundancy for superior reliability

Engineered to maximize uptime while offering superior custody transfer accuracy, the new, fully-redundant 3417 Gas Ultrasonic Flow Meter delivers the ultimate in measurement verification and validation. The advanced, dual-configuration meter combines the power of two field-proven four-path British Gas-design meters in a single body, enabling two independent measurements in one meter run.

Available in DN200 to DN1050 (8-in to 42-in)⁽¹⁾ line sizes, each standard 3417 meter is equipped with powerful 3410 Series Electronics and robust transducers that are engineered for wet, rich and/or dirty gas applications. A new patented transducer synchronization method ensures the meter's electronics provide the highest sampling rates possible, resulting in more stable ultrasonic signals for better flow resolution.

To further reduce measurement uncertainty, the electronics' firmware processes AGA 8 Part 2 speed of sound calculations in real time for comparison with the meter's SOS measurement.

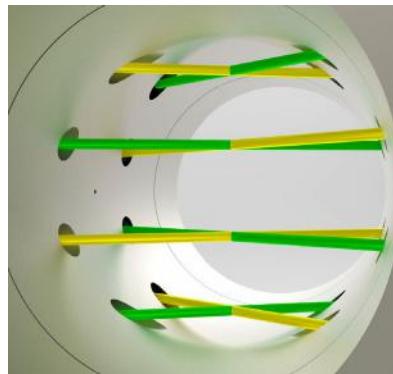

An updated version of MeterLink software gives operators advanced insight and allows real-time monitoring of the meter from a PC or laptop, enabling immediate diagnosis of potential flow disturbances to help eliminate unplanned shutdowns. In addition, the meter's extensive hourly and daily logging enables operators to trend the two independent meters over time, helping extend calibration cycles for significant cost reduction.

Figure 1: Based on the field-proven British Gas design, the fully-redundant 3417 meter combines two sets of four direct paths for ultra-reliable custody transfer measurement

Typical applications

Custody transfer for natural gas

Application sites

- Pipeline interconnects
- Pipelines (no bypass)
- Border stations
- Offshore production
- Industry/city gates
- Power plants
- LNG regasification terminals

Features and benefits

- Fully-redundant model with two field-proven 4-path chordal, British Gas-design meters (OIML Accuracy Class 0.5) in one body offering:
 - Direct inputs for pressure, temperature and gas composition that allow speed of sound calculations using AGA 10 2003 and GERC-2008 (AGA 8 Part 2, 2017)
 - Automatic calculations and totalization of corrected volume rates, mass rates and energy rates
 - Ethernet connectivity for expedited data transfer
 - Operating pressures down to 0 psig
- Ultra-reliable dual configuration with two independent measurements for multiple applications, including:
 - Verification of measurement performance and/or as a complete backup in remote locations
 - Pay-check configuration between two contracting parties for significant savings
 - Bi-directional measurement with one transmitter dedicated to forward flow and one to reverse flow
- Patented transducer synchronization method increases sampling speed, resulting in faster detection of flow disturbances to expedite alerts and troubleshooting
- T-200 Transducers are safely extractable under pressure without special tools and the non-wetted design eliminates the possibility of greenhouse gas emissions
- 3410 Series Electronics provide an expandable platform and an expansive archive data log to simplify accounting and dispute resolution

- Trending data captured by two independent transmitters can also help extend calibration cycles
- New Type 4 CPU Module offers additional I/O with five frequency or digital outputs and one digital input that can be configured as the sixth output if needed
- Local LED displays (optional) on each transmitter offer up to ten user-selectable scrolling variables
- High rangeability (>100:1) that eliminates an additional meter run
- 5D upstream piping requirement (with flow conditioner) for offshore rigs and other sites with limited straight run
- The Rosemount 3417 Gas Ultrasonic Flow Meter is now available with Smart Meter Verification, giving users access to expert flow analysis and providing a simplified and intuitive overall measurement status result minimizing time spent analyzing data. This new feature can be accessed through Modbus or MeterLink Diagnostic Software.

Standard specifications

Please consult an Emerson Ultrasonics product specialist if requirements are outside of the listed specifications. Other product and material offerings may be available depending on the application.

Meter specifications

Characteristics

- Two redundant 4-path (eight transducers per transmitter) chordal design

Meter performance

- Flow calibrated accuracy is $\pm 0.1\%$ of reading over entire flow calibration range
- Repeatability is $\pm 0.05\%$ of reading for 5 to 100 ft/s (1.5 to 30.5 m/s)

Velocity range

- Nominal 1.7 to 100 ft/s (0.5 to 30 m/s) with over-range performance exceeding 125 ft/s (38 m/s) on some sizes
- Meter meets or exceeds AGA 9 2017 3rd Edition / ISO 17089 performance specifications

Table 1: AGA 9 / ISO 17089 Flow rate values (US customary metrics)

Meter size (in)	8 to 24	30	36	42
q_{\min} (ft/s)	1.7	1.7	1.7	1.7
q_t (ft/s)	10	8.5	7.5	CF
q_{\max} (ft/s)	100	85	75	CF

Table 2: AGA 9 / ISO 17089 Flow rate values (metric units)

Meter size (DN)	200 to 600	750	900	1050
q_{\min} (m/s)	0.5	0.5	0.5	0.5
q_t (m/s)	3.048	2.591	2.29	CF
q_{\max} (m/s)	30.48	25.91	22.86	CF

Electronics performance

Power per transmitter

- 10.4 VDC to 36 VDC
- 8 watts typical; 15 watts maximum

Total meter consumption

- 16 watts typical; 30 watts maximum

Mechanical ratings

Line sizes

- 8-in to 42-in (DN200 to DN1050)⁽²⁾ with British Gas (BG) orientation

Operating gas temperature (transducers)

- T-200⁽³⁾: -58 °F to +257 °F (-50 °C to 125 °C)
- T-21: -4 °F to +212 °F (-20 °C to +100 °C)
- T-41: -58 °F to +212 °F (-50 °C to +100 °C)
- T-22: -58 °F to +212 °F (-50 °C to +100 °C)

Operating pressure range (transducers)

- T-200⁽³⁾: 15 to 3,750 psig (1.03 to 258.55 bar)
- T-21/T-41/T-22: 100 to 4,000 psig (6.89 to 275.79 bar)
- T-21/T-41: 50 psig (3.45 bar) minimum operating pressure available with reduced Q_{max}⁽⁴⁾
- T-22: 0 to 3,750 psig (3.44 to 258.55 bar)⁽⁵⁾

Flanges

- Raised Face (RF) and Ring Type Joint (RTJ) for ANSI Classes 300 to 1,500 (PN 50 to 250)
- Compact flanges/hub end connectors (optional)

NACE, NORSOK and PED compliance

- Designed for NACE compliance⁽⁶⁾
- NORSOK available upon request
- PED available upon request

Electronics ratings

Operating temperature

- With T-200 transducers: -40 °F to 257 °F (-40 °C to 125 °C)
- With T-21/T-22/T-41 transducers: -40 °F to 212 °F (-40 °C to 100 °C)

Operating relative humidity

- Up to 95% non-condensing

Storage temperature

- -40 °F to +185 °F (-40 °C to +85 °C) with a low temperature storage limit of -4 °F (-20 °C) for T-21 transducers and -58 °F (-50 °C) for T-41/T-22 transducers

Electronic housing

- Integral mount

(2) Consult factory on meter sizes above DN900 (36-in).

(3) Available for line sizes up to 36-in. Minimum operating pressure varies by line size. Consult factory for minimum operating pressures below 100 psig.

(4) Refer to page 9 for additional information pertaining to operation limits.

(5) To use T-22 for low pressure applications below 100 psig (6.89 bar), the meter must be equipped with isolated transducer mounts.

(6) It is the equipment user's responsibility to select the materials suitable for the intended services.

Materials of construction

The materials of construction are dependent upon application requirements that must be specified by the customer. If needed, an Emerson representative can provide material guidance.

Material specifications

Body and flange

Forgings

- ASTM A350 Gr LF2 Carbon Steel⁽⁷⁾
-50 °F to +302 °F (-46 °C to +150 °C)
- ASTM A350 Gr LF2 Carbon Steel⁽⁷⁾
-58 °F to +302 °F (-50 °C to +150 °C)
- ASTM A182 Gr F316/F316L Stainless Steel (Dual Certified)
-50 °F to +302 °F (-46 °C to +150 °C)
- ASTM A182 Gr F51 Duplex Stainless Steel⁽⁸⁾
-58 °F to +302 °F (-50 °C to +150 °C)
- ASTM A105 Carbon Steel
-20 °F to +302 °F (-29 °C to +150 °C)

Enclosure housing

- Standard: ASTM B26 Gr A356.0 T6 Aluminum
- Optional: ASTM A351 Gr CF8M Stainless Steel

Electronics bracket

Stainless steel material

- 316SS

Transducer components

Transducer mounts and holders O-rings

- Standard: Nitrile Butadiene Rubber (NBR)
- Other materials available

Transducer Mounts and Holders

- ASTM A564 Type 630 Stainless Steel Mounts
- ASTM A479 316L Stainless Steel Holders
- INCONEL® ASTM B446 (UNS N06625) Gr 1 Mount (optional)
- INCONEL ASTM B446 (UNS N06625) Gr 1 Holder (optional)

(7) Impact tested per specified ASTM standard.

(8) A995 4A material is not yet approved in Canada.

Paint specifications

Body and flange exterior

Carbon Steel body material

- 2 coat paint; inorganic zinc primer and acrylic lacquer topcoat (standard)

Stainless Steel or Duplex body material

- Paint (optional)

Transducer shroud

Aluminum material

- Powder coated

Enclosure housing

Aluminum material

- 100% conversion coated and exterior coated with a polyurethane enamel

Stainless Steel material

- Passivated (optional)

Table 3: Body and Flange Maximum Pressure Ratings by Construction Materials [bar Meter Sizes DN200 to DN1050]⁽¹⁾

PN	Forged Carbon Steel	Forged 316/316L SS	Duplex SS
50	51.1	49.6	51.7
100	102.1	99.3	103.4
150	153.2	148.9	155.1
200	255.3	248.2	258.6

(1) Pressure rating information is for -20 °F to +100 °F (-29 °C to +38 °C). Other temperatures may reduce the maximum pressure rating of the materials.

Table 4: Body and Flange Maximum Pressure Ratings by Construction Materials [psi Meter Sizes 8-in to 42-in]⁽¹⁾

ANSI Class	Forged Carbon Steel	Forged 316/316L SS	Duplex SS
300	740	720	750
600	1,480	1,440	1,500
900	2,220	2,160	2,250
1,500	3,705	3,600	3,750

(1) Pressure rating information is for -20 °F to +100 °F (-29 °C to +38 °C). Other temperatures may reduce the maximum pressure rating of the materials.

Meter sizing

US Customary units

[Table 5](#) and [Table 6](#) can be used to determine the flow range at reference conditions for all meter sizes. All calculations are based on Schedule 40 bore, +60 °F and typical gas composition (AGA 8 Amarillo). These values are intended to be a guide in sizing. Please confirm meter sizing with an Emerson Ultrasonics product specialist prior to order placement.

Calculating meter capacity

To calculate a volume rate for a given velocity, first find the capacity (flow rate) in table [Table 5](#) or [Table 6](#) for the meter size and operating pressure. Next, multiply the capacity by the ratio of the desired velocity divided by 100 ft/s to obtain the desired volume rate.

The example below illustrates how to determine the hourly flow rate at 70 ft/s for an 8-inch meter operating at 800 psig:

If Flow Rate = 7,842 MSCFH and Velocity = 70 ft/s, the calculation is:

$$\frac{7,842 \text{ MSCFH} \times 70 \text{ ft/s}}{100 \text{ ft/s}} = 5,489.4 \text{ MSCFH}$$

Table 5: Flow Rates (MSCFH) Based Upon Max Rated Velocity [8-in to 24-in = 100 ft/s] [30-in = 85 ft/s] [36-in = 75 ft/s]

Meter size (in)	8	10	12	16	20	24	30	36	42
Operating pressure (psig)	100	989	1,559	2,213	3,494	5,495	7,948	10,910	13,862

Metric units

[Table 7](#) and [Table 8](#) can be used to determine the flow range at reference conditions for all meter sizes. All calculations are based on Schedule 40 bore, +15 °C and typical gas composition (AGA 8 Amarillo). These values are intended to be a guide in sizing. Please confirm meter sizing with an Emerson Ultrasonics product specialist prior to order placement.

Calculating meter capacity

To calculate a volume rate for a given velocity, first find the capacity (flow rate) in table [Table 7](#) or [Table 8](#) for the meter size and operating pressure. Next, multiply the capacity by the ratio of the desired velocity divided by 30.5 m/s to obtain the desired volume rate.

The example below illustrates how to determine the hourly flow rate at 21 m/s for a DN200 meter operating at 4,500 kPag:

If Flow Rate = 178 MSCMH and Velocity = 21 m/s, the calculation is:

$$\frac{178 \text{ MSCMH} \times 21 \text{ m/s}}{30.5 \text{ m/s}} = 122.6 \text{ MSCMH}$$

Table 7: Flow Rates (MSCMH) Based Upon Max Rated Velocity [DN200 to DN600 = 30.5 m/s] [DN750 = 25.9 m/s] [DN900 = 22.9 m/s]

Meter size (DN)	200	250	300	400	500	600	750	900	1050
Operating pressure (kPag)	1,000	39	62	88	139	218	315	432	550
	1,500	58	91	129	204	320	463	635	809
	2,000	77	121	171	270	425	615	843	1,074

T-200 Titanium encapsulated transducers

New non-wetted design

Designed for today's challenging application requirements, Ultrasonics T-200 Transducers are robustly designed for high performance in the harshest environments, such as process gases containing oil, wet gas, and corrosive chemicals.

The possibility of hydrocarbon corrosion is virtually eliminated due to the full metal, non-wetted design for increased longevity and stability. The T-200 design is also easy to use and maintain. The innovative transducer smart capsule, a single part, is retractable under pressure with no special tools, simplifying maintenance, minimizing downtime and maximizing safety and convenience.

T-200 transducers are standard in meters sized DN200 to DN900 (8-in to 36-in) but may also be available in additional sizes upon request.

Figure 2: T-200 Transducer Assembly

Features and benefits

- Patented MiniHorn array technology mechanically amplifies the transducer signal, overcoming any signal attenuation or effects from reverberation
- Non-wetted: Full metal encapsulated transducer located outside the process is impervious to liquid borne dirt and corrosive fluids such as H₂S
- Retrofittable: Easily upgrade existing meters that have T-11/T-12 or T-21/T-22 transducers
- Long-term reliability: Isolated transducer design provides a barrier from corrosive hydrocarbon fluids and extends the life of transducer components
- Extractable under pressure: The simplified smart capsule design is easily retractable without depressurizing the line and does not require a high-pressure extraction tool
- Non-wetted design eliminates possibility of greenhouse gas emissions during extraction operations
- Higher temperature rating: Allows for higher operating temperature and cleaning while inline
- Extended warranty: 3-years standard

Transducer specifications

Product compatibility

- Line sizes DN200 to DN1050 (8-in to 42-in)
- Consult Factory for larger sizes.

Materials of construction

- Ti Gr12 Housing / 17-4PH Stalk Assembly (standard)
- Ti Gr12 Housing / 316/316L Stainless Steel Stalk Assembly (optional)
- Ti Gr12 Housing / Inconel Stalk Assembly (optional)

Fluid types

- Hydrocarbons, industrial gases, H₂S (100%)

Fluid temperature

- -58 °F to +257 °F (-50 °C to 125 °C)

Operating pressure

- 15 to 3,750 psig (1.03 to 258.55 bar)

Operating frequency

- 125 kHz

Local LCD Display

The 3410 Series Electronics offer an optional local LCD display that utilizes three lines to indicate the variable name, variable value and engineering units. The local display configuration is supported via MeterLink software or Emerson's AMS Trex Device with HART® interface protocol.

The local display shows up to 10 items which are user selectable from 26 variables. The display can be configured to scale volume units as actual or 000's, with an adjustable time base of seconds, hours or days. The scroll rate can be adjusted from 1 to 100 seconds (default 5 seconds).

Figure 4: Local LCD display

Table 9: User selectable display variables

Variables	Description
Volumetric Flow Rate	Uncorrected (actual) Corrected (standard or normal)
Average Flow Velocity	(no description necessary)
Average Speed of Sound	(no description necessary)
Pressure	Flowing, if utilized
Temperature	Flowing, if utilized
Frequency Output	1A, 1B, 2A or 2B
Frequency Output K-factor	Channel 1 or 2
Analog Output	1 or 2
Current Day's Volume Totals	Uncorrected or Corrected (forward or reverse)
Previous Day's Volume Totals	Uncorrected or Corrected (forward or reverse)
Total Volume Totals (non-reset)	Uncorrected or Corrected (forward or reverse)

Input/output

Diagnostics and software

Significantly reduce time previously spent on data analysis and troubleshooting with the new Smart Meter Verification feature now included in the latest meter firmware update. Walk away with more confidence in your measurement with a clear measurement verification result as well as meter and process status results.

Every Ultrasonic flow meter works with advanced MeterLink Software to simplify monitoring and troubleshooting. This advanced software displays a number of performance-based diagnostics that indicate meter health. In addition, dynamic flow-based diagnostics help operators identify flow disturbances that may affect measurement uncertainty. The latest version of MeterLink has been optimized to work with Smart Meter Verification, allowing for easy collection of monthly scheduled or on-demand SMV reports.

Figure 5: MeterLink Baseline Viewer

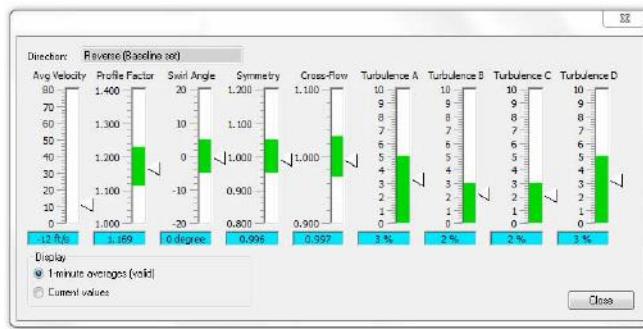

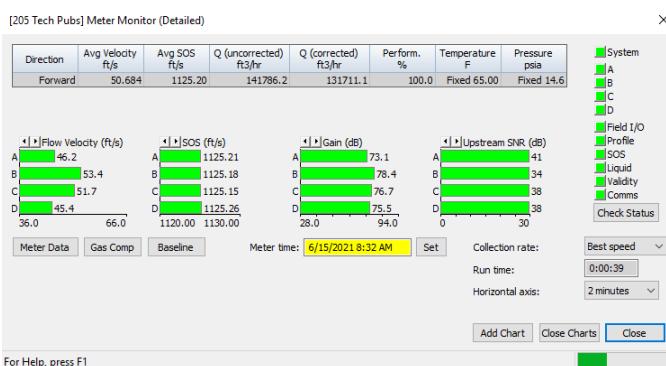

Figure 6: MeterLink Monitor Screen

- MeterLink software is downloadable at no charge
- MeterLink is required for transmitter configuration
 - Meter also configurable with AMS Device Manager or TREX Device, if HART® is used
- MeterLink connects to meters using Ethernet (recommended), RS232, or RS485 full duplex
- Supports Microsoft® Windows 7, 8.1, and 10
- Microsoft Office 2010-2019

(1) Net Monitor is an application automatically available with MeterLink that allows the user to access and monitor all Ultrasonic Flow Meters that are part of a network.

(2) AGA 10 2003 and GERC-2008 (AGA 8 Part 2, 2017) supported.

Safety and compliance

The 3417 Gas Ultrasonic Flow Meter meets worldwide industry standards for electrical and intrinsic safety certifications and approvals. Consult an Emerson Ultrasonics technical specialist for a complete list of agencies and certifications.

Recommended installation

Recommended pipe lengths

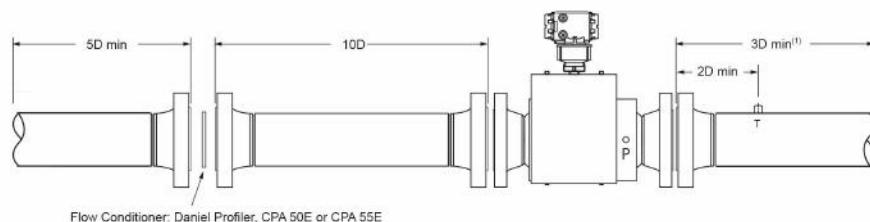

The drawings below represent the manufacturer's recommended minimum pipe lengths for the installation of the 3417 Meter. The final recommendations are dependent upon application requirements that must be specified by the customer. Other lengths and flow conditioners can be accommodated. An Emerson Ultrasonics product specialist can provide guidance as needed.

Figure 14: Piping recommendation for Gas Ultrasonic Meter (No flow conditioner)

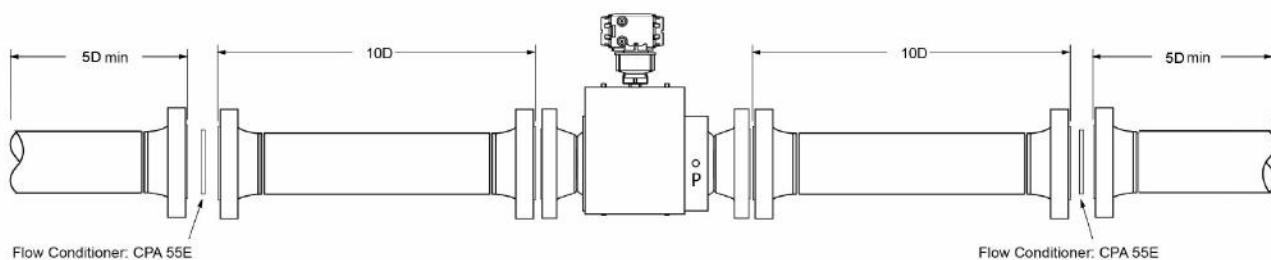

3D min⁽¹⁾ = Additional pipe length may be required for additional taps (i.e. sample probe, test well, etc.).

Figure 15: Piping recommendation for Gas Ultrasonic Meter with a flow conditioner

3D min⁽¹⁾ = Additional pipe length may be required for additional taps (i.e. sample probe, test well, etc.).

Figure 16: Piping recommendation for bi-directional Gas Ultrasonic Meter with flow conditioners

Note

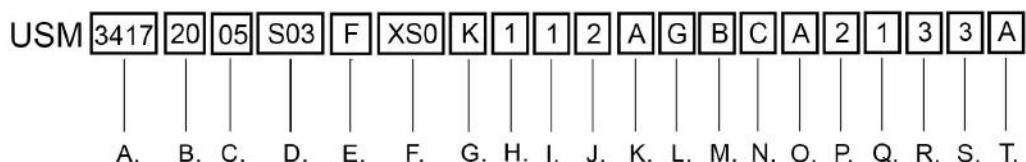

- For best results, flow conditioning is recommended
- D = Nominal pipe size in inches (i.e., 8-in pipe size; 10D = 80-in)
- T = Temperature measurement location
- Pressure measurement location provided on meter body

Important

Compact installations options available.

	STD	Schedule STD
	XS0	Schedule XS
	XXS	Schedule XXS

Transducer assembly	1	T200 (-50 °C to +12 °C) - 17-4PH Standard Stalk, NBR O-ring
	2	T200 (-50 °C to +12 °C) - 17-4PH Standard Stalk, FKM O-ring
	4	T200 (-40 °C to +125 °C) Inconel Stalk, FKM O-ring ⁽¹⁾
	5	T200 (-40 °C to +125 °C) – Optional Stalk (316/316L), NBR ⁽¹⁾
	6	T200 (-40 °C to +125 °C) - Optional Stalk (316/316L), FKM ⁽¹⁾
	G	T-21 (-20 °C to +100 °C) - Standard Mounts/Holders, NBR O-ring
	I	T-22 (-50 °C to +100 °C) - Isolated Standard Mounts/316L Holders, NBR O-ring
	L	T-21 (-20 °C to +100 °C) - Inconel Mounts/Inconel Holders, FKM O-ring
	N	T-41 (-50 °C to +100 °C) - Standard Mounts/Holders, NBR O-ring
	O	T-21 (-20 °C to +100 °C) - Inconel Mounts/316L Holders, FKM O-ring

	Z	T-22 (-40 °C to +100 °C) - Isolated Inconel Mounts/Inconel Holders, FKM O-ring
--	---	--

(1) Available for line sizes up to 42-in. Consult factory for minimum operating pressures below 100 psig.

Enclosure type	1	Aluminum (standard)
	2	Stainless steel (optional)
Pressure taps	1	3½-in NPT
	3	Pipette
Category	Code	Description
Conduit type	1	¾-in NPT
	2	M20 (reducers required)
Electronics mounting	A	Integral mount
CPU/Displays	J	I/O Type 4 (6 Frequency/Digital Outputs, 1 Analog Output)
	K	I/O Type 4 (6 Frequency/Digital Outputs, 1 Analog Output)/Displays
Transmitter Head 1 expansion module	A	None
	B	Serial RS232
	C	Serial RS485
	G	Expansion I/O Module
Transmitter Head 2 expansion module	A	None
	B	Serial RS232
	C	Serial RS485
Wireless	A	None
	B	THUM
Tagging format (Line size/ Pressure rating/Flow parameters)	1	Inch/ANSI/US Customary
	2	Inch/ANSI/Metric
	3	DN/PN/US Customary
	4	DN/PN Metric
Tagging language	1	English
	2	French
	3	Russian
	4	Chinese
Pressure Directive Certification	1	None
	2	PED (must select electrical approval 2)

	3	Canadian Boiler Branch (CRN)
	4	EAC-Russia
Category	Code	Description
Electrical approvals	1	UL/c-UL
	2	ATEX/IECEx
	3	INMETRO
	4	Russia
Metrology approval	A	None
	B	European Union - MID Directive
	C	China (CPA-2015-F101)
	D	Brazil (INMETRO)
	F	EAC - Russia
